**BUILDING THE FUTURE OF MEXICO**

**Oversized Transport**

**Transport of industrial structures and lifting operations**

**Transport with Lowboy, Lowbed, Flatbed and Extendable trailers**

**Refrigerated trailers and dry vans**

## Message from Our Director

This year at JRO Transportes Especializados, we proudly celebrate a new anniversary. More than just a number, these years represent a history built on effort, commitment, and passion for serving our clients with excellence.

Each project, every partnership, and every achievement reached is the result of a team that has known how to grow, adapt, and consistently maintain quality as its main hallmark.

Today, as we present our Service Catalog, we want to share not only what we do, but also what drives us: the conviction that trust is earned through results, experience is built through consistency, and leadership is sustained through innovation and responsibility.

Over more than four decades, we have actively participated in sectors as diverse as food, manufacturing, cement, and energy, among others. This diversity has strengthened us and allowed us to evolve, continuously improving our fabrication and assembly processes, and consolidating a working model based on safety, efficiency, and respect for the environment.

This anniversary is also a moment to look toward the future.

We reaffirm our commitment to continuous improvement, the training of our human talent—our most valuable resource—and the generation of solutions that drive the sustainable development of our clients and our country.

Thank you for accompanying us on this journey.

At JRO, we want to continue being part of your projects, contributing experience, quality, and commitment at every step of the way.

With appreciation and gratitude,

Ing. Carlos Eliud Reséndiz Lopez  
Director General

# TIMELINE OUR HISTORY

## OUR TRAJECTORY

1986

We were born and began operations in a small workshop, equipped with a welding machine, a toolbox, and a deep desire to grow. That's how we started forging our path in the industrial world, guided by determination and faith.

The transformation begins

2000

We invested in infrastructure and formed solid work teams, which allowed us to expand our reach and enter new markets, strengthening our presence in the industry.

Vision of the future

2013

We transformed into Fabricaciones y Montajes Industriales JRO (FMI). New partners joined, and strategic alliances were consolidated, placing the customer at the center of every decision.

JTE

2021

In the face of the health crisis, we worked tirelessly to ensure the continuity of our clients' operations. We reaffirmed our commitment to quality, safety, the environment, and occupational health, which remain our fundamental pillars.

2025

We made significant investments to modernize our manufacturing processes, with the purpose of improving quality, optimizing delivery times, and maximizing customer satisfaction. We bet on innovation as the path to a more efficient, competitive, and sustainable future.

Actualidad

## The beginnings of a dream

1996

After a decade of continuous effort and sacrifice, new family members and committed personnel joined. We expanded our service catalog to better meet our clients' needs.

## Agents of Change

2008

We redirected our strategic efforts and reinforced our vision. A key phase of asset acquisition began, firmly focused on achieving operational excellence.

FMI

2015

As an extension of our business vision, JRO Transportes Especializados (JTE) was created to expand our logistical and technical capabilities, addressing the sector's evolving demands.

## Retos que transforman

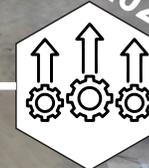

2015

Grúas JRO was born, aiming to provide specialized solutions in lifting and maneuvering, incorporating a fleet of cranes and a highly skilled technical team.

## Retos que transforman

2026

Continuous improvement remains one of our main goals. We continue to strengthen our technical, human, and operational capabilities to remain industry leaders and respond with excellence to the new challenges of the market.

# Oversized Transport

Our ground transportation operations are carried out using Lowboy and Lowbed units, specialized equipment for heavy and oversized cargo transport, with an operational capacity of up to 75 tons.

# Structure Transport

and heavy lifting operations

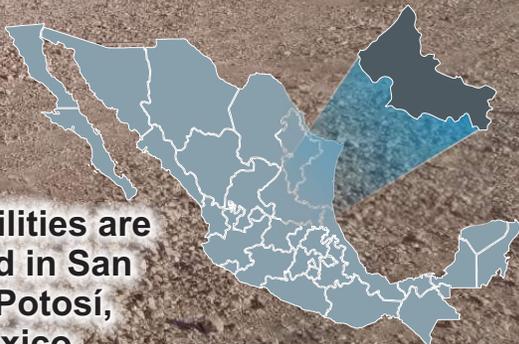

## JRO TRANSPORTES ESPECIALIZADOS

We continue to evolve and apply continuous improvement in our processes, ensuring that this is reflected and conveyed in the quality leading service we deliver to our clients.

# Lowboy, Lowbed and Extendable Flatbed Transport

Our facilities are located in San Luis Potosí, Mexico

**Aspen Lowboy –  
65-ton Capacity**

# Lowboy Trailers – 50, 65 and 75 48-ft Lowbed

48-ft Modular Platform

**We comply with all physical and documentary requirements necessary for access to regulated facilities, as well as for cross-border operations with the United States. In addition, we carry out scheduled crossings to any other border within the country.**

Our facilities are located in San Luis Potosí, Mexico.

No	Equipment	Capacity	
1	Refrigerated trailer	40 ft	
2	Lowbed trailer	48 ft	
3	Lowboy	48 ft	50 ton
4	Lowboy	48 ft	65 ton
5	Extendable flatbed	75 ft	
6	Flatbed trailer	48 ft	
7	Modular flatbed	48 ft	75 ton

At JRO TRANSPORTES ESPECIALIZADOS, we condemn all acts of violence that affect global society, and we have decided to pursue certification under the Customs-Trade Partnership Against Terrorism (C-TPAT).

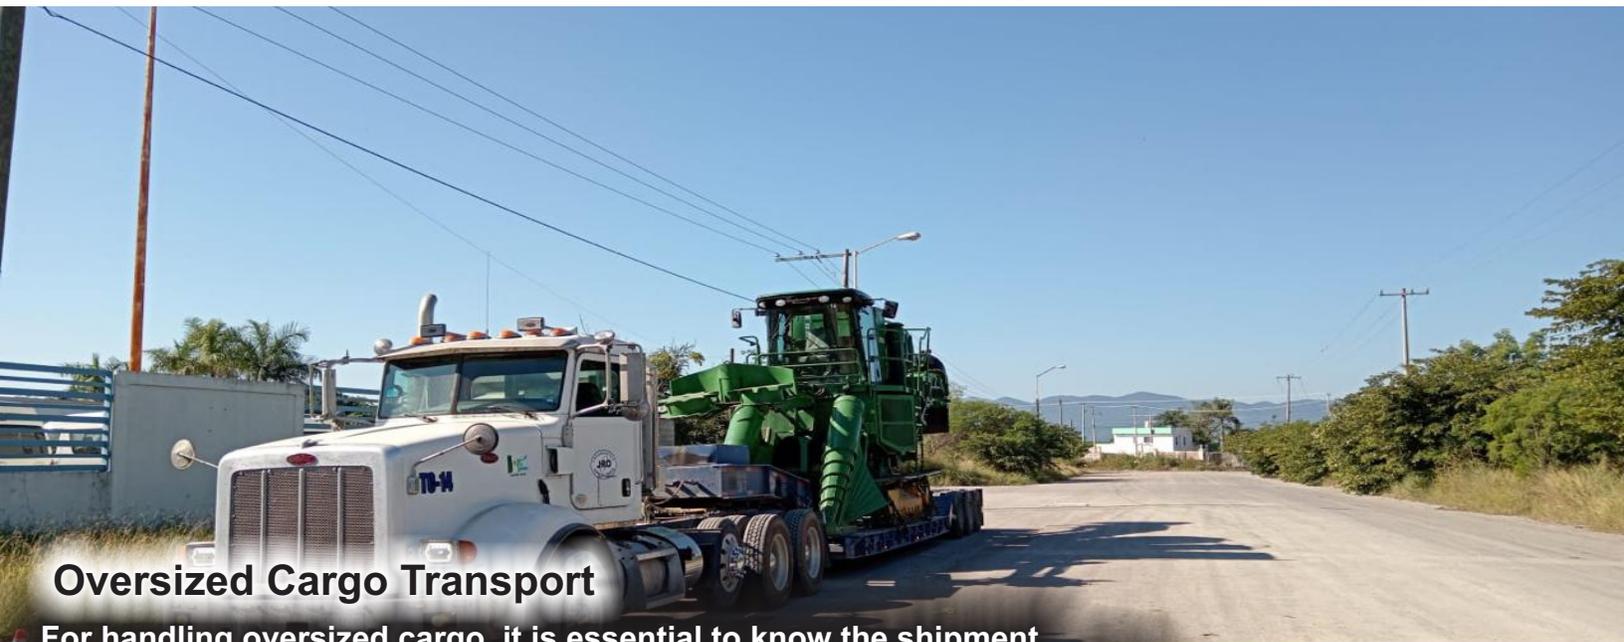

We are currently in the process of obtaining this certification, working diligently every day to achieve it and to provide our clients with the confidence of working with a responsible and secure company.

# Oversized Transport Logistics Solutions

**We are professionals  
in transportation  
services.**

## Oversized Cargo Transport

For handling oversized cargo, it is essential to know the shipment dimensions—length, width, height, and weight—in order to properly plan transportation and define a route that allows safe and efficient delivery.

**Today, JRO TRANSPORTES ESPECIALIZADOS continues to evolve and implement continuous improvement in our processes, with the objective that this is directly reflected in the quality of service we offer to our clients.**
